

Wood-Based Construction

Mass Timber and Beyond

Madison, Wisconsin
September 20, 2017

Advancements in wood technologies have expanded the use of wood in design and construction. Mass timber products such as cross-laminated timber (CLT) have emerged and offer opportunities in tall wood construction. Come explore how wood building systems are a sustainable, cost-effective solution for tackling modern design needs.

Architects, engineers, designers, developers, general contractors and anyone interested in wood design are encouraged to attend this informative seminar!

The event will feature a tour of the Promega's Crossroads, showcasing an innovative mix of glulam and cross-laminated timber

8:30AM - 4:00PM

Promega Corporation
BioPharmaceutical Technology Center
5445 East Cheryl Parkway
Madison, WI 53711

Cost: \$30.00 (\$15.00 Students)

Online Registration

**Event fulfills 4.5 AIA/CES credits

Topics Include:

- Overview of Wood-Based Products and Building Systems
- Environmental Considerations of Wood
- Mass Timber Technologies and Research
- Building Codes
- Case Studies

The work upon which this project is based was funded in part through a grant awarded by U.S. Forest Service Wood Innovations.

This institution is an equal opportunity provider.
